

# MY BENESCH

*"You have to be able to adapt and adjust as a startup to survive the 'valleys of death' in getting to commercialization. Benesch knows how to step into unconventional situations and come up with creative ways to keep things moving forward."*

**JAY SCHABEL**

**President**

**RES Polyflow and Brightmark Energy's  
Plastics Division**

RES Polyflow developed a novel technology that converts end-of-life plastics into valuable hydrocarbon products. Commercializing this type of innovative technology can be a multiyear process—before you even reach the starting line for ongoing production and sales.

Jay and RES Polyflow have been on that journey for 11 years, with Benesch right alongside. From identifying the opportunity to securing funding to negotiating deals and handling the myriad of issues involved in IP protection, shareholder matters, plant construction and more, Benesch brings the entrepreneurial spirit, business acumen and breadth of legal counsel that helps new ventures start up and take off.
