

I'm like a doctor to your business.

I give **legal
advice**
on **health care.**

Like any industry,

health care has its headaches.

Its pain points and signs of aging.

Regulation, compliance,
reimbursement, reform.

Managing care while managing costs.

The governing laws change
day by day, state by state.

Administration by administration.

You need proactive diagnosis and treatment
from more than a general practitioner.

Our Health Care Practice Group handles
transactional, regulatory and litigation matters.

For providers and payors, private investors
and third-party administrators.

Our clients can't afford
to ignore warning signs.

Or take risks with the health of their business.
Can you?

I'm **ALAN SCHABES.**

I'm on your team.
