When your workforce spans front-office and warehouse environments, employment and human capital issues become twice as varied and complex. Operating in multiple jurisdictions with ever-evolving regulations further complicates compliance and risk management. Adina and her team rise to the challenge every day with help from Benesch teams to support labor and employment matters as well as M&A deals. By translating legal principles for multiple audiences and delivering up-to-the-minute guidance and ongoing education in practical, actionable terms, Benesch helps Global Industrial stay a distribution industry leader and an employer of choice.
