

Columbus Business First Highlights Benesch Insights on AI Prompt Risks and Litigation Exposure

JUNE 1, 2026

Featured Practices: [Artificial Intelligence \(AI\)](#), [Trade Secrets, Restrictive Covenants & Unfair Competition](#), [Litigation](#)

Columbus Business First article recently featured insights from Benesch Partner and Chair of the [AI Commission Kristopher Chandler](#) and Associate [Megan Parker](#) on the evolving legal risks associated with artificial intelligence.

In the article, Kristopher and Megan examine how the use of generative AI tools-particularly user-entered prompts-may create potential litigation exposure. As courts continue to evaluate the discoverability of AI-generated content, their analysis highlights the importance for companies to understand how these tools may impact confidentiality, privilege, and risk management strategies.

Their analysis highlights the rapidly evolving legal landscape around AI and emphasizes the importance of implementing thoughtful governance policies when integrating AI into business operations.
