In a rapidly evolving global economy, supply chain disruption has shifted from an operational headache to a strategic and legal challenge. In his recent *The Foundation* article, “Supply Chain Disruption Risk: A Legal Perspective for Procurement Functions,” Partner [Jonathan Todd](#) breaks down the major categories of disruption risk and shares practical guidance for procurement and legal professionals navigating these complexities.

Todd’s article highlights how traditional supply chain practices-such as dependence on single-source suppliers or “dusting off” standard contracts-are no longer sufficient in the face of geopolitical volatility, compliance challenges, and shifting market dynamics. Instead, he emphasizes a proactive risk-management framework that integrates thorough supply mapping, targeted due diligence, and strategic contract drafting tailored to identified risks.
