AUGUST 11, 2026

Mark Silberman, Vice Chair of Benesch's Healthcare Practice Group, was recently quoted in a Law360 article, "*CMS Fraud Concerns Drive Call For Autism Therapy Audits*". The article examines new CMS guidance aimed at increasing oversight of autism therapy providers amid concerns about fraud, waste and rising Medicaid spending.

Silberman noted, "The problem is we're looking at everyone through the same lens. We're looking at everyone as if they're doing something wrong, and as a result, we're initiating aggressive audits."
