

Cleveland Diagnostics, Inc. Raises Over \$19 Million in Financing

FEBRUARY 9, 2021

Benesch represented Cleveland Diagnostics, Inc., a clinical-stage biotechnology company developing next-generation diagnostic tests for the early detection of cancers, during its Series D round of investing lead by Lyfe Capital which raised over \$19 million in financing.

Funds raised will be used to expand commercialization of IsoPSA-the company's first diagnostic test, designed to enhance early detection of prostate cancer-as well as to expand internal infrastructure and operations to support platform development for other tests, including breast and lung cancer.

The Benesch team included Sean Peppard and Ryan Williams.
