Jason Greis Discusses AI-Driven Downcoding Challenges in Vascular Disease Management Interview

AUGUST 24, 2026

Featured Practices: [Healthcare](#), [Artificial Intelligence \(AI\)](#)

Benesch Healthcare Partner [Jason Greis](#) was featured in an interview with *Vascular Disease Management* discussing the growing impact of artificial intelligence on healthcare reimbursement and the challenges AI-driven downcoding poses for physician practices.

In the article, “*Fighting Back Against Artificial Intelligence-Driven Downcoding*,” Greis explains how healthcare providers can recognize warning signs that payers may be relying too heavily on AI to review claims, including repeated audits and consistent downcoding of the same CPT codes. He also outlines practical strategies for responding to payer audits, improving documentation practices, and leveraging data analytics to identify reimbursement trends.

Greis notes that AI is playing an increasingly significant role in claims reviews and reimbursement decisions, making it critical for physician practices to proactively monitor payment patterns and strengthen their revenue protection efforts. He also discusses the evolving legal and regulatory landscape surrounding AI use in healthcare claims adjudication.
