Jonathan Todd Interviewed on 7NEWS Australia about Presidential Tariffs Supreme Court Case

NOVEMBER 5, 2025

Benesch Transportation & Logistics Vice Chair [Jonathan Todd](#) was interviewed on 7NEWS Australia's *Sunrise* morning news show about the Supreme Court case examining whether the President has the constitutional authority to impose tariffs.

In the segment, Jonathan explains that the Court is evaluating whether an emergency existed, whether statutory authority was properly invoked and if legal procedures were followed. He notes the volatility in tariff decisions this year and that the Supreme Court is expediting the case, though the timeline for a final ruling remains uncertain. Jonathan also outlines potential outcomes: the tariffs could be upheld, overturned (potentially resulting in refunds for importers) or the President's authority could be narrowed if the proper process was not followed. The prevailing view is that the tariffs will be either fully affirmed or completely reversed.
