Overview

Steve has deep knowledge in application lifecycle management, system integrations, and project execution. He ensures seamless technology operations that drive efficiency and innovation.

Steve manages the development, testing, deployment, and ongoing support of key enterprise application technologies. His role extends beyond technical leadership, as he collaborates daily with attorneys and C-suite executives to align technology strategies with business objectives, ensuring long-term success.

A problem-solver and strategic thinker, Steve has a proven track record of delivering high-impact solutions that enhance performance and user experience. His commitment to excellence and customer service continues to shape the firm's technological advancement.
